

Syed Zain Ali Shah

Full Stack Developer

With a passion for web and app development, I am continuously enhancing my skills in cloud computing (AWS). I believe that successful development goes beyond writing code, it's just as important to thoroughly test the code to ensure that web applications are both functional and scalable.

WORK EXPERIENCE

Frontend Engineer

Kodexo Labs

01/2025 - Present

Pakistan

Achievements/Tasks

- Worked on building and supporting AI applications, helping clients solve real-world business problems with innovative solutions.
- Developed multiple AI-driven projects while continuously learning and implementing new AI tools and frameworks.
- Collaborated with cross-functional teams to deliver high-quality, efficient, and customized AI solutions for diverse client needs.

Full Stack Developer

Techsol LLC

01/2024 - 12/2024

Pakistan

Achievements/Tasks

- Worked as a full-stack developer at Techsol LLC, developing a full-stack web app using Next.js and Express.js.
- Developed the Techsol LLC website using Next.js and Strapi for CMS and integrated Stripe for payment processing. Learned about virtual machines and the Ubuntu operating system, hosting the website on a virtual machine.
- Implemented preventive maintenance strategies, resulting in a 20% decrease in equipment downtime.

Frontend Developer

BawdicSoft Pvt Ltd

12/2022 - 01/2024

Pakistan

Achievements/Tasks

- Started as a frontend intern at Bawdicsoft.
- Contributed to the frontend of a CRM project using React which tracks employee details.
- Contributed to a Web3 and Node.js project, where my role was developing a scalable frontend.

SKILLS

Javascript

React Js

Next Js

Typescript

Python

Tailwind CSS

Node Js

Nest Js

MongoDB

PERSONAL PROJECTS

GroomX (03/2025 - 05/2025)

- **Groomx** – A SaaS platform for pet grooming businesses enabling users to preview AI-generated images of their pets post-grooming. Features include staff, client, grooming session, and tools management. Built with **Next.js** on the frontend and integrated AI for personalized pet visualization. Designed for efficiency and seamless shop operations.

Synaptics Solution (06/2024 - 07/2024)

- **Synaptics Solutions** is a software agency that specializes in AI, web applications, and mobile applications. I worked as a full-stack developer, where I used Next.js for the frontend. I also implemented ISR (Incremental Static Regeneration) for website performance. For content management, I used Contentful. It was a great experience working with Synaptics Solution.

Phone Case (03/2024 - 04/2024)

- A **Phone Case** is a project where users can design custom phone cases based on their phone model. I built this project to deepen my understanding of Prisma. I used Next.js for the frontend, Prisma ORM, PostgreSQL for the database, Uploadthing for media files, Zod for validation, and Stripe for payments. This project helped me gain practical experience and my development skills.
